Hi Roland,

As discussed today, you need to update your Notice of Intent forms for your South Hill quarry to include the area outside your approved disturbance boundary (see attached Notice).

Here is the information that you need to provide the Division. Let me know if you have any questions.

1) An updated operation map identifying the following, consistent with page 5 of the Notice:

- both new and improved roads,
- boundaries of current disturbances,
- boundaries of future disturbances,
- boundaries of areas that are graded but not released yet, and
- known topsoil pile locations.

Let me know if you need help with a map.

2) An updated page 3 from your Notice.

- Identify the legal description, since other parts of Section 16 were disturbed while mining in the south area. FYI, the adjacent section also may have been partially disturbed as well, though the areas were regraded when I inspected last.

3) An updated page 5 from your Notice, with the following identified:

- the total acreage you plan to disturb over the entire project or the next 5 years (including your regraded areas in both north and south mining areas, the currently-active open pits, and the future areas you plan to dig in, consistent with the operation map),
- the dimensions of new roads (consistent with the operation map)
- the dimensions of improved roads (consistent with the operation map)
- any other changes to the general description of your mining method

Blank Notice form pages 3 and 5 are attached. Fill them out completely, and resubmit them once you know they're consistent with the map.

Since the area of open/active disturbance is still under within your permitted and bonded 1 acre, and since you are reclaiming as you go, I'm not overly concerned, but you need to know that repeated or knowing mining outside of permitted boundaries will lead to mine cessation order and fines.

Let me know if you have questions. Let's get this done within the next month or sooner.

Peter
